Peter,

That'll be fine. Also I've been meaning to get back to you on the suggestion on placing limestone or calcium hydroxide (lime) in the R n B. Allen and I have been discussing this based on experience at the American Tunnel and Kohler. We can discuss this together Wednesday.

See you then.

Steve

Steve – Just so you know, at Wednesday's ARSG meeting, I'm planning on moving the discussion about the R&B and Gold King to the end of the agenda. Steve Fearn has a meeting conflict, but hopes to get to the end of the meeting. I know this is a topic that interests him.

See you Wednesday.

Peter Butler
